Postgraduate Library information session

Lesego Makhafola
lesego.makhafola@up.ac.za

Department of Library Services, University of Pretoria

10 March 2017
Aspects to be covered:

- Library overview
- Where to find information
- E-journals
- Plagiarism, Copyright & Referencing techniques
Where to find information for Mining engineering

Welcome to the new service of the Department of Library Services

The Subject Guides are customised to fit the needs of our clients with updated sources, tips and relevant content within a specific subject. For more information go to the Subject Guide, ask your Information Specialist.

Showing 72 Guides

Access & Discovery

Accounting

African languages

Afrikaans & Dutch

Agricultural Economics, Extension and Rural Development
Welcome to the Mining Engineering subject guide.

This guide will provide students, researchers and staff with access to subject and information resources.

Shelve numbers for Mining engineering books

Mining engineering books can be found at the following shelve numbers:

Open collection: **662.1 - 662.8**

In the reference section the books with start with the letter N, e.g. **N662.1**

Copyright, plagiarism and referencing techniques
Plagiarism

You commit plagiarism when you present someone else's ideas - published or unpublished – as if they were your own.
Plagiarism: When you don’t say where you took it from

Copyright Infringement: When you take it without permission

Moral

Legal

Both: When you take it without permission and pass it off as your work

9. View the similarity report that opens in a new window. The **Document Viewer** might take a while to load. Text that is similar to any text on the www databases is marked in a colour that is the same as the corresponding source in the Match Overview column on the right hand side. Matching sources are numbered and sorted from highest to lowest occurrence in the document.
THANK YOU 😊
